Career Objective

Aspiring AI Automation Engineer with a strong foundation in Python, FastAPI, REST APIs, and problem-solving. Passionate about building AI-powered applications, intelligent workflows, and scalable backend systems using modern AI technologies. Currently pursuing MCA at Vellore Institute of Technology while developing real-world AI automation projects.

Education

2025 – Present	Master of Computer Applications (MCA) Vellore Institute of Technology	CGPA: 8.7
2021 – 2024	Bachelor of Computer Applications (BCA) Kashi Institute of Technology	CGPA: 7.3

Technical Skills

Programming Languages	Python
Frameworks	FastAPI
AI & Automation	n8n, Ollama, OpenAI API, AI Agents, Prompt Engineering, RAG (Learning)
Databases	SQL,Postgresql
Tools	Git, GitHub, VS Code, Postman, Linux (Pop!_OS), Docker
Core Concepts	REST APIs, Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Projects

SkillBridge AI – Intelligent Career Assistant

- Developed a full-stack AI career assistant using Python, FastAPI, React, PostgreSQL, and Ollama.
- Integrated Ollama + LLaMA 3 for automated resume analysis, skill-gap detection, match scoring, and learning recommendations.
- Implemented REST APIs with JWT authentication, bcrypt, SQLAlchemy ORM, and user-specific resume analysis history.
- Used PyMuPDF for PDF text extraction and PostgreSQL for storing users, resumes, and analysis results.
- Built a React frontend with Tailwind CSS, Axios, protected routes, drag-and-drop upload, pagination, and dark mode.

YatraVerse – AI-Powered Travel Assistant

2026

- Developed an AI-powered travel planning platform using Python, FastAPI, React, PostgreSQL, and LLM APIs.
- Integrated AI for personalized itinerary generation, destination recommendations, and travel assistance based on user preferences.
- Built REST APIs for user authentication, trip planning, itinerary management, and AI-powered recommendations.
- Designed a scalable backend with PostgreSQL and SQLAlchemy for managing users, trips, destinations, and itineraries.
- Developed a responsive React interface with Tailwind CSS, Axios, protected routes, and interactive trip planning features.
